The Pediatric Triple Action® ankle joint was designed to fit within your pediatric practice by offering unparalleled features for the treatment of complex neuromuscular disorders. Compact, lightweight and extremely durable, the Pediatric Triple Action uses precision engineered high resistance springs to keep up with your most active patients while minimizing return maintenance visits.

**Features:**
- Independent adjustment of plantarflexion and dorsiflexion resistance
- Independent alignment feature adjusts ankle angle and tunes shank to vertical angle
- Staged Resist Adaptor spring (sold separately) when additional ankle and knee control is required

**Model 3C76**
- 140 mm (5.5 in) H
- 40 mm (1.6 in) W
