

Announcing the New and Improved Maple Leaf™

Model 147

The re-designed, anatomically contoured proximal section provides greater control of the lumbar spine and pelvic region, improved comfort and enhanced patient compliance.

Improved design allows the pelvic section to be adjusted by simply loosening the screws and sliding the pelvic section to the desired width.

Hip joints have been off-set to provide greater clearance; rotational adjustments can easily be made to accurately position the hip in the transverse plane.

New thigh cuff design with extended medial contour provides greater leverage for abducting the patient's hip.

New Maple Leaf™ Sizing Information

In our effort to improve the Maple Leaf™, we have developed a new Extra Small size and reconfigured the sizing parameters for all models to meet the needs of a broader range of patients. Please take a moment to review the new sizing information shown right.

** All Extra Small models are sent with a variant of our 2040-C EconoHip™ joint. The joints have a preset abduction angle of 15 degrees and are not attached to the pelvic section allowing the Orthotist to choose the position that best suits the needs of the patient.*

Model Number	Pelvic Diameter
147-L	11 3/4" to 13 1/2"
147-M	9 3/4" to 11 1/2"
147-S	7 3/4" to 9 1/2"
147-XS*	6" to 7 1/2"
147-C	Custom
