

Camber Axis Hinge[®] Modular Upright Kit

It's the perfect fit

Options: The Camber Axis Hinge is now available with modular uprights to further enhance your orthotic design options. The 3/16" x 3/4" aluminum proximal upright and 1/8" thick stainless steel stirrup have been specifically designed to fit the proximal and distal uprights of the Camber Axis Hinge.

Convenience: The **Camber Axis Hinge Modular Upright Kit** is supplied fully assembled and comes complete with seven, color coded, range-of-motion keys, which eliminate the need for posterior stop mechanisms. This joint permits a solid ankle design that can be easily changed to articulated motion with variable stop settings.

Design: Designed to provide optimal control in the sagittal plane and increase mediolateral stability, the **Camber Axis Hinge Modular Upright Kit** is made with the same Becker quality you have come to know and trust.

750-M-UK

Range-of-Motion Keys

		Motion*	
Key		Standard	Reverse
0°	Locked	Neutral	
5°	Locked	5° Dorsiflexion	5° Plantarflexion
10°	Locked	10° Dorsiflexion	10° Plantarflexion
15°	Locked	15° Dorsiflexion	15° Plantarflexion
0°-30°	Motion	0° - 30° Dorsiflexion	0° - 30° Plantarflexion
5°-10°	Motion	5° - 10° Plantar to Dorsi	5° - 10° Dorsi to Plantar
7.5°-10°	Motion	7.5° - 10° Plantar to Dorsi	7.5° - 10° Dorsi to Plantar

*Motion on the Camber Axis Hinge can be "reversed" by switching the keys from the left side to the right side and vice versa.
