The SpineCor®
Dynamic Corrective Brace

SpineCor is a dynamic system that utilizes postural re-education to target 4 key progression factors of idiopathic scoliosis: Neuro-Musculo-Skeletal Dysfunction, Growth Asymmetry, Postural Disorganization and Spinal Deformation.

Curve specification corrective movement strategies are provoked repeatedly by wearing the orthosis during normal activities of daily life. SpineCor allows and encourages patients to engage in activities such as sports, dance, and riding; it is easily worn underneath the patient’s clothing for optimal cosmesis. US Patent No. 5,599,286

SpineCor Advantages:
• 89% effective; clinically proven in a 400 patient, 10 year study
• Documented Cobb angle reductions maintained for 5 years after treatment
• Dedicated U.S. technical/clinical support staff
• Increased patient acceptance-better compliance
• Custom made to measurement from Becker Central Fabrication
• “L” code L1005
