

GET TRAINED SEPT 8th OR SEE US AT AOPA BOOTH 422

Are you tired of working harder for less profits?

Are you billing less L-codes and accepting less reimbursement?

Are you struggling to achieve positive and consistent clinical outcomes?

Does your company lack a point of differentiation?

Are you looking for a better way?

## The HiFi™ Interface System is Unlike Anything Else!

**The HiFi Interface is proven and backed by evidence-based clinical support.** Provide your patients with greater comfort, faster walking speeds, greater energy savings, increased stability and control, decreased pistoning and shear, reduced volume fluctuations, increased range of motion, greater proprioception and much more.

**The HiFi Interface is a custom-made socket.** Bill for test sockets, socket base codes, socket replacements, and appropriate miscellaneous codes. Increase your revenues, don't minimize them.

**The HiFi Interface is flexible, adaptable, compatible, and subschial.** The HiFi is adjustable, lightweight, low profile, and can be used with all known suspension methods. It is suitable for wearers of all ages and activity levels and can be fabricated in-house or through CFab.

**The HiFi Interface is for both upper and lower limb wearers** and was the interface used on DEKA's Luke Arm (DARPA's Revolutionizing Prosthetics Program).

**The HiFi Interface has been worn successfully by 1000s of patients** and is a proven socket technology, not a fad or facade.

**The HiFi Interface allows you to differentiate your company** and provides you with a clinical reason to host an in-service or recall clinic.

**The HiFi Interface gives you the casting/scanning tools, methods and techniques to help you fit a patient better** (superior outcomes), **faster** (easier, standardized modifications and trim lines), and **cheaper** (fewer, better fitting test sockets).

**The HiFi Interface keeps you in control and relevant.** Don't minimize your expertise or limit your role in the fitting of custom interfaces. Because if you do, so will payors.

**The HiFi Interface System is extremely affordable.** Learn about our new licensing model and discover how the HiFi is the most cost-effective socket system available.

## GET TRAINED AND LICENSED IN HiFi™ TIBIAL, FEMORAL, AND NOW RADIAL & HUMERAL

The HiFi™ Interface and HiFi™ Imager technologies are patented and patents-pending. Unauthorized use of the technology or trademarks is not permitted. If you are a prosthetist and concerned you may be utilizing our Skeletal Capture™ and control technology or want to obtain a license to use in custom, modular, or socket kit applications, **CONTACT US TODAY!**
