### Breg T Scope® Premier

The Breg T Scope Premier Post-Op knee brace is designed to provide protected, controlled range-of-motion for patients recovering from knee surgery or those who have knee injuries or instabilities. The brace is comfortable, lightweight, simple to apply, and easily adjustable for a personal fit. It features a patented, user-friendly hinge to control the range of motion of the patient's knee. It is universal and fits most patients so there are less SKUs to stock in inventory. The innovative BridgeTech Incision Pad (an optional accessory) provides added comfort around the incision site. The T Scope Premier post-op knee brace brings a time-tested design, easy-to-use features, high performance, and unprecedented comfort to help ensure patient compliance. #0881x (L1832).

### CircAid Juxta-Fit™ Premium

Instantly adjustable inelastic bands make this garment easy to apply, remove, and target specific areas as needed throughout the period of wear. Each Juxta-Fit system includes a user-friendly BPS™ guide card with multiple compression ranges for quickly and accurately verifying the application of prescribed compression levels. Available in two standard lengths, 28cm and 36cm, and eight standard sizes with three full calf options, the Juxta-Fit Premium Lower Legging provides leg coverage from the ankle to the knee and is covered by a one-year limited warranty. *Part numbers vary depending on size and style.*

### Silipos® Pediatric/Upper Extremity Suspension Sleeve

Designed for use with pediatric BK Sockets, pediatric UE Sockets, and adult UE Sockets. The sleeve reduces friction, abrasion, and pressure on the residual limb while providing maximum comfort and range of motion. It protects the skin and aids in skin repair post-surgically. Fully lined with medical grade mineral oil gel, the sleeve provides ample stretch. The gel also moves with the skin to avoid bunching behind the knee or elbow. Sleeve can be cut to preferred size. Latex free and hypoallergenic. #13025 (L5685).

### Orfit Industries ORFITRANS™ STIFF

Considered the gold standard check socket material, Orfitrans Stiff is transparent, rigid, and strong. The material will not crack, break, or shatter if dropped; it is virtually indestructible. It pulls easily and uniformly. Material can be easily drilled. The material is available in a wide array of sheet sizes and thicknesses: 8mm, 10mm, 12mm, 15mm. *Part numbers vary depending on size.*

### Swiftwick® Valor Liner Sock

The Valor compression liner sock is the most advanced moisture managing liner sock on the planet. The Valor combines Olefin, a hollow Nobel Prize-winning environmentally-friendly fiber, with a sculptured compression construction that incorporates Swiftwick's patented Active-Antimicrobial technology. These distinctive elements create the most effective solution for managing sweat, bacteria, wounds and limb volume changes inside the prosthetic liner. Available in 3, 5, 7, 9, 11, 13, and 15 inch lengths. #CG1244-xx (L8420/L8470/L8400).

### R&B Medical Rhythm Liner

The Rhythm liner offers maximum protection from abrasion and breakdown on residual limbs. Available in three gel thicknesses and various sizes to adapt to the amputee's limb circumference. The liner cold forms after 48 hours to alleviate bunching and gathering behind the knee. No other fabric is as durable, nor does any other fabric allow for the natural flexion of the leg with such comfort. 6 month warranty. #10-RBW8000-xx-xx (Locking)/#10-RBW8500-xx-xx (Cushion) (L5681/L5683).

### Raize™

The Raize is a lightweight, microprocessor-controlled hydraulic ankle/foot system encompassed in a low-profile design. By simply pressing a button on the key fob, the wearer can control rollover resistance, lock or unlock the ankle, and adjust the heel height. Its increased plantar/dorsi-flexion range and terrain accommodation mode enhance stability on slopes and varying surfaces. Includes bluetooth-enabled computer interface for initial setup by prosthetist. Weight rating set at 220 lbs. From Hosmer, a Fillauer Company. #628xx, #629xx (L5973).

### Orthomerica® California Catalina™

The California Catalina's unique two-pull closure system makes it easy-to-fit and simple for the patient to don and doff. The Catalina limits motion and provides effective compression for the relief of lower back pain, making it ideal throughout rehabilitation treatment. The Catalina 631 and 637 both deliver effective compression to the region of pain localizing the patient's therapy while maintaining comfort for the patient. The Catalina 637 also contains rigid side panels that provide additional lateral support. 3386.631.0x (L0631); 3386.637.0x (L0637).

## Ossur Rebound Hip™

The Rebound Hip post-surgical brace provides gentle controlling forces that facilitate healing while allowing users to safely perform daily activities. By limiting flexion, extension and rotation, the capsule is protected during critical post-surgical rehabilitation. Flexion and extension range of motion can be easily controlled by adjusting the stops in the hip plate; rotation can be addressed with the position of the thigh strap. The sliding joint mechanism accurately follows the anatomical motion of the hip joint while maintaining the prescribed flexion/extension restrictions. The Rebound Hip is available in three lengths with four sizes of soft goods to fit a wide range of patients. It can be modified for different levels of abduction support and either left or right sided use. Minimal componentry makes the brace user-friendly. #98022x. *Softgoods including pelvic and thigh straps sold separately (#9801xxRB) (L1686).*

## ST&G EZ Step Foot

The EZ Step foot provides a compounding flexible keel and integrated pyramid adapter. The foot combines high-tech performance with simplicity. Optimum flexibility, toe response, and soft heel cushion promotes a smooth rollover. Foot comes standard with a durable Kingsley foot shell. Easy adaptation for amputees with lower activity levels. #1106=xxx-xxx (L8972).

## Cybertech™ Pathway LS

The new Cybertech Pathway LS (Lumbar Stabilizer) allows the practitioner various pre and postoperative management options. It allows for a progression of rehab adaptability with removable/replaceable anterior and posterior panels. Molded posterior panel contours to the natural shape of the lumbar anatomy. A unique low-profile removable anterior panel pocketed into the belt ensures greater patient comfort and compliance. Quick, one-hand 5:1 ratio and a low friction Flexible Pulley System provides powerful, smooth, and easily-controlled compression. Provides support and comfort for standing and sitting. Includes built-in hand straps for patients with arthritic hand involvement. #60-3212-x (L0627).

## DeRoyal® Universal XTW Extended Wear Collar

Welcome to the future of orthopedic bracing. The DeRoyal Universal XTW Extended Wear Collar features an adjustable dial powered Boa® Technology that allows collar height modification to fit most patients. The innovative design allows the practitioner to quickly, easily, and effectively fit each individual patient, without the hassle and inventory of sized collars. The Universal XTW Collar helps restrict flexion, extension, lateral bending and axial rotation, providing the support and stability needed to promote cervical spine healing and recovery. Once applied, the collar features a compliance ring designed to secure the adjustment dial in order to prevent unintended size changes and promote patient compliance. Experience the new standard of excellence in spinal bracing with the DeRoyal Universal XTW Extended Wear Collar powered by Boa® Technology. #11301000 (L0174).

## Trulife Matrix™ Max 2

The Matrix Max 2 is designed for low to high activity patients with unilateral or bilateral drop foot as well as partial foot amputations. Easy-trim footplate fits up to three shoe sizes with one product size and can be trimmed with a simple pair of scissors. The Matrix Max 2 features a slightly more rigid strut for greater stability and durability. A more narrow foot plate in the medial arch allows for an easier and better fit in a shoe. Product is heat-moldable, trimmable, and has a height adjustable anterior shell. Protective shrink tubing along the lateral strut protects the shoe against damage. Small to X-Large sizes available. #FH260xxx (L1932).

## 5280 Prosthetics Smartpuck™

The SmartPuck is the industry's first intelligent socket system with integrated vacuum. The SmartPuck has an onboard computer that provides critical K-Level information and alignment data. The unit creates an airtight seal in the socket with every installation. The SmartPuck housing serves as a negative pressure tank, which acts as an air reservoir, reducing the run time of the vacuum pump and the drain on the battery. There are no external hoses, charge ports or barbs to contend with. No special adapters or attachment devices are necessary. Each Smartpuck comes with the gift of an iPod Touch to control the unit. #SP-200 (L5781, L7368 - battery charger).
