

# soleus<sup>®</sup>

## BETTER THAN EVER

**40g LIGHTER**

**40% STRONGER**

Since its release in 2009, the innovative Soleus foot has received an extraordinary response from users. The engineers at College Park paid careful attention to the performance of the Soleus in the real world and have rolled out improvements throughout the entire product line. Strengthening of the fastener system and new developments in materials have resulted in a significantly lighter and stronger foot.
