

Coyote[®] Composite

Don't let carbon irritate you!

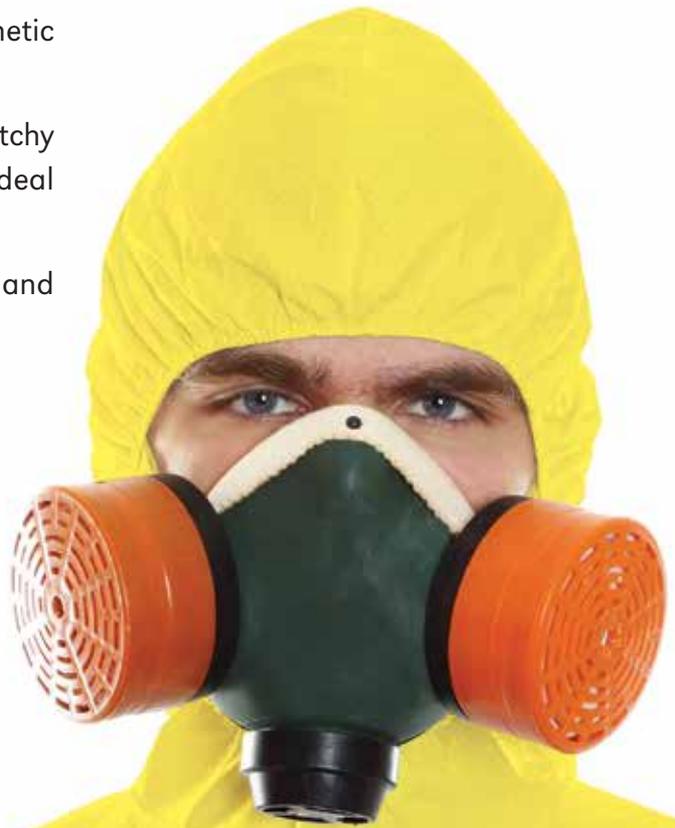

Tired of suiting up to grind carbon sockets? We are too! Made from a natural material, Coyote Composites' proprietary braid is specifically designed for prosthetic and orthotic use.

Create a tough comfortable socket without the itchy irritation and potential inhalant risk of carbon! It's ideal for socket and AFO fabrication, and less expensive.

Visit coyotedesign.com for new lay-up options and fabrication tips.

Order now direct from Coyote or from our distributors.

Braid available in 3", 4", 6", 8" and 10" sizes. 5" and 7" sizes coming soon! Reinforcement rope also available.
