

Safety + savings!

Our lab is concerned with safety and the bottom line

On top of basic safety measures like eyewear, we're also using Coyote Composite to avoid the itch, irritation, and inhalant risk of carbon braid.

With Coyote Composite we can create smooth edges without extra effort, as well as more flexible and durable laminations. All at a lower cost!

Big roll = big savings!

Order our 82' roll of Coyote composite and you'll see some serious savings. Available in 3", 4", 5", 6", 7", 8" and 10" widths.
