

With Comfort Comes Confidence

OP-TEK® Flex BiLam

OP-TEK® Flex BiLam provides added comfort and improves aesthetics for patients wearing carbon socket frames.

The inner layer contains a hypoallergenic, FDA compliant additive that reduces friction, and the outer layer helps hide trim lines and window cut-outs.

OP-TEK® Flex materials are soft, flexible EVA copolymers available exclusively from Curbell O&P. They are formulated to maintain consistent walls during forming while decreasing cold-flow (creep).

Put us to work for you!™

Supplying quality plastic sheets, transfer papers, and fabrication supplies to the O&P professional nationwide.
