POSTURAL EXTENSION II ORTHOSIS

Code Approved L0456

The PE II TLSO is ergonomically designed to **control and relieve acute pain** associated with anomalies of the spine. Osteoporosis, compression fractures, spinal stenosis, strain and excessive kyphosis may be **comfortably** treated. The aluminum posterior frame is **adjustable** allowing the practitioner full customization. This makes therapeutic **extended alignment** of the thoracic spine possible including stabilization of the lumbar spine and pelvis.

Patents: 35,940; 6, 609, 642, B2
