

Exos™ Free Motion Ankle

The Future of
Ankle Bracing is here.
A customized fit
in just 30 minutes.

The Exos groundbreaking thermoformable material can be fully customized and formed to a patient within 30 minutes providing functional stabilization of the foot-ankle complex to address PTTD, long term chronic injuries and post-op rehab. Customizable and easy to fit - with minimal cost to the practice and patient.

Exos Free Motion Ankle. More than a brace. A difference in treatment.
