

...because

everybody's

different.

The **E-Tendon** is a high durometer silicone that flexes the liner, reducing the amount of bunching behind the knee. It also helps to overcome the resistance of flexion by the liner and sleeve.

Liner color shown for demonstration purposes only.

Designed by a certified prosthetist, Evolution Silk custom liners fit the exact needs of each user. Our liners are more durable than custom urethane liners. Liners can be made from a negative cast, positive cast, and AOP files from INSIGNIA and other systems.

E-Tendons are available in custom Silk liners by request.

Features of the Evolution Liners include:

- A silky surface that allows the liner to slide on itself
- No coatings that crack, peel or wear off
- Compatible with all high vacuum sockets
- Easy to don and doff
- No covers to tear or run
- Medical grade silicone
