

# EVOLUTION CUSTOM LINERS

*We design a custom mold for every patient.*

## Custom Origin

The Custom Origin, featuring Origin Silk, is excellent for uniquely shaped limbs and/or sensitive limbs; made from a positive cast, negative cast, or AOP files from INSIGNIA by a certified prosthetist.

## Custom Origin w/ Wave

The Wave Feature is excellent for patients of all lifestyles and activity levels that want superior freedom of movement. The Wave reduces distal pull, bunching behind the knee, and increases elasticity near the knee.

## the Natural

The Natural is made without any additives to the silicone giving it a tackier, more tactile feel for patients that want more traction. Also, without the extra additives, the Natural is great for extra sensitive patients.

Silicone Injection

Bill

The most important innovation of Evolution's custom liner process: teamwork. From customer service to design, mold making, silicone pouring, quality control, and shipping, we communicate the smallest details which results in a custom liner that always fits perfectly with cushion where you want it and less where you don't.
