

Definitive Sockets

Made from a special weave and weight of premium grade carbon fiber that results in a lighter, stronger socket.

Central Fabrication

Evolution Central Fabrication

Evolution's central fabrication facility provides high quality full service lower extremity socket creation. Choose from a wide variety of builds, componentry, and materials to custom build each socket to be made exactly to your specifications. Our technical team is comprised of individuals including certified technicians and on site prosthetists.

Componentry for Sockets

Evolution Component Systems

Evolution's component systems give the clinician the most versatility to mix and match a wide variety of resources in today's market. Our components and supplies make for a solidly reliable solution that will let you evolve and develop the best system for your patient's lifestyle.

W01-001 | Valve Starter Kit

The starter kit is Evolution's all inclusive set that can accommodate all of our standard component builds.

Echo patent: 7,144,429

Aura & Echo

Custom Origin Silicone Liner

Both the Aura and the Echo are 'locking seals' made to allow the prosthetist to select the height of the seal for both transtibial and transfemoral patients. The Aura Locking Seal is designed for soft tissue density, and the Echo is made for medium to firm tissue density. The silicone seal is fully embedded into a one play sock for durability and maximum suspension. Both are available in standard and custom sizes, machine washable, and easy to care for.

Aura Locking Seal
Solid seal made for soft tissue density.
easy to use and easy to care for.

Custom ORIGIN

Custom Origin Silicone Liner

The Custom Origin is excellent for uniquely shaped limbs and/or sensitive limbs. It can be made from a positive cast, negative cast, and AOP files from INSIGNIA and other systems. Initial liners can be produced in 5 business days and additional liners on request in 3 business days.

Evolution Silicone

Evolution liners are manufactured with a unique medical grade silicone formula developed specifically for the Orthopedic industry; it's innately compatible with human tissue and resistant to fluids and bacteria.

Origin Off the Shelf

Origin Off the Shelf stock sizes are also available and is made from the same high quality silicone.
