

Ferrier Coupler Inc.

INNOVATIVE OPTIONS

Trowbridge Terra-Round Foot

- 1 The Trowbridge Terra-Round accessory foot mounts directly inside a standard 30mm pylon. The center stem flexes allowing the unit to conform to uneven terrain.
- 2 It is also useful in the lab when fitting the prototype limb.
- 3 The unit is water resistant and has a traction base pad.
- 4 Optional base (T805) has spikes for walking after skiing, ice fishing, etc. No extra mounting hardware required.
