

FOR STABLE, SPONTANEOUS OR TRAUMATIC SPINAL COMPRESSION FRACTURES...

hyperextend to mend

Reduce pain and provide protection. Whether you expect your patient to spontaneously resolve or wish to maintain pre- and postsurgical stability, select the Jewett™ Hyperextension Orthosis. Three points of leverage maintain therapeutic immobilization, reducing the load on the anterior vertebral bodies (T-7 through L-5).

- High quality, fatigue-resistant materials are crafted to deliver strength with malleability; the practitioner can form the appliance, optimizing fit and function
- Protects patients during return to normal daily activities
- Lightweight and well-ventilated; helps ensure maximum patient comfort and compliance
- Low profile and fit; patients wear normal clothing
- Water resistant; cleans up with mild soap and water
- Available exclusively through licensed or Certified Orthotists

There is No Substitute for a Genuine Jewett™ Brace

For more information on the Jewett™ Hyperextension Orthosis, please see your local Orthotist or contact:
