

FOR STABLE, SPONTANEOUS OR TRAUMATIC SPINAL COMPRESSION FRACTURES...

newoptions ADD value

HYPEREXTEND TO MEND. Reduce pain and provide protection. Whether you expect your patient to spontaneously resolve or wish to maintain pre- and postsurgical stability, select the Jewett™ Hyperextension Orthosis. Three points of leverage maintain therapeutic immobilization, reducing the load on the anterior vertebral bodies (T-7 through L-5).

New V-35 adheres to the design parameters of the original Jewett™ Hyperextension Orthosis

New features benefit patients AND practitioners with easier and quicker fittings, greater patient comfort and improved patient compliance:

- Corrosion resistant aluminum frame, with finely polished finish
- Back Pad with single polyester lumbar strap, chafe & ladder lock construction with single screw assembly
- Ratchet Buckle snag-free closure system with single screw assembly in right or left hand configuration
- Nine standard sizes, in stock and available for same day shipment
- Value priced

*Quantity discount and free shipping, subject to terms and conditions.
Customer Service hours 8:00 am - 6:30 pm ET;
most orders placed by 5:00 pm will ship same day*
