

HEIGHT MATTERS.

But at less than 2" tall, there's no inferiority complex here.

Introducing the Pacifica™ LP Prosthetic Foot,

the newest member of the Freedom Series™ family.

Engineered to provide the perfect balance of flexibility and durability, it is the energy-returning choice for systems

requiring a bit more build space. Add to this a split toe for stability and the overall performance is huge—in every regard but stature. Call 888.818.6777 for more information. Also distributed through SPS at 800.767.7776.

Circle # 68 on Readers' Service Card

Sierra™ (FS 1000)

Highlander™ (FS 3000)

Pacifica™ (FS 2000)

With the addition of the Pacifica™ LP, there are now four height options in our renamed Freedom Series of prosthetic feet.
