

THE NEW FRIDDLE'S MINI-VAC VACUUM SYSTEM

Item # 700-060

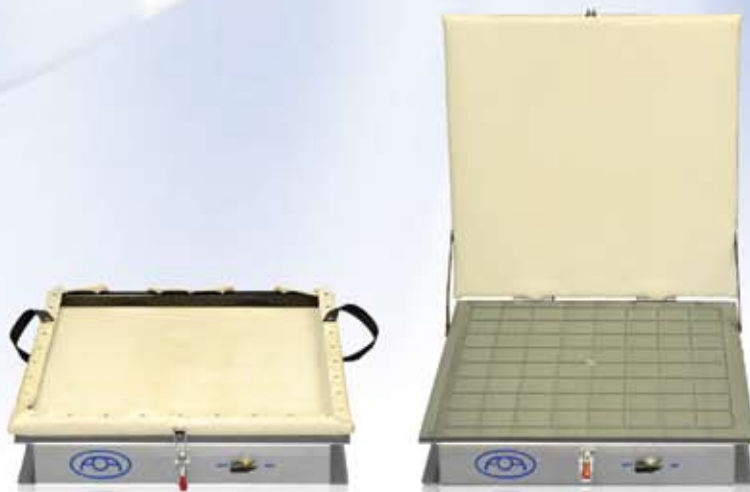

Over the years, Friddle's has provided the orthotics and prosthetics industry with top quality, innovative products. The Mini-Vac Vacuum System is another "standard setting" product. This vacuum system offers unmatched functionality and quality for your fabrication lab. Our "low maintenance" unit is designed for convenience and longevity using the finest materials and components available. For professional supplies and products...always consider Friddle's.

MINI-VAC Vacuum System Features:

- Vacuum pressure gauge
- 2 gallon vacuum tank
- Adjustable pressure switch
- 1/4 h.p. oilless vacuum pump
- 115 volt single phase
- Check valve
- Solid metal tubed hoses
- Automatic on/off switch

WORKS PERFECTLY WITH OUR VAC-MAX

Friddle's continues to change the industry with its latest introduction to the Orthotic and Pedorthic equipment market. The Friddle VAC-MAX 24 X 24 vacuum press (table) is the largest Vacuum Press (table) available in the profession. With a useable work space of 22" X 22", you will have plenty of room to vacuum more foot orthotics at once, leaving you much more needed time available for your patients rather than for fabricating.

Item # 700066
