

# Elegant Science.

## Ninja

The Ninja is a spinal system built upon a comfortable yet supportive belt with a **6X mechanical advantage**, single pull strap. One easy pull securely conforms the Ninja to the patient's torso.

Best of all, the Ninja is a **progressive orthosis** – as your patient heals, the support and control can be progressively diminished.

Hope delivers the form that fits with the results you demand.

**Hope**  **Orthopedic**

Form. Fit. Function.
