

Composite Orthotic Materials for All Walks of Life

Thermoplastic composite materials represent the most versatile orthotics material today. Thanks to the addition of our XTX Sprint and NRG Plates, no one has more varieties than JMS Plastics. That gives you more options and more convenience since all of our products are in stock and ready to ship!

XTX Sprint

XTX is easy to mold, lightweight, durable and comes in four rigidities and three colors. It is produced using high strength carbon and glass fibers in a tough unique polypropylene matrix. XTX allows for deep contour molding using conventional equipment.

- Molds deep heel cups and directional rigidity for greater foot support and control
- Very lightweight
- Thin, durable material for Custom Orthotics
- Easy to mold and finish
- High performance, yet economical

4 rigidities to meet all patients' demands:

- XTX Ease-Flex – ultra thin, for comfort and gentle support
- XTX Semi-Rigid – provides strong support with springback
- XTX Rigid – withstands heavy use without cracking
- XTX Ultra-Rigid – for extreme activities and weight
