

Da Vinci  
figured  
it out...

...so has KLM Labs!

Leonardo Da Vinci discovered that human bodies are proportionally aligned; our physiques have predictable, mathematical relationships.

KLM used the same logic to create System\_Rx patented technology: A sophisticated library of injection molded functional orthoses that you can custom fit to your patients on the first visit!

The result? Satisfied patients and increased cash flow, without the hassle of insurance. Patients receive treatment immediately, and you get paid when services are rendered.

Circle # 230 on Readers' Service Card

Get on the fast track to Increased Revenue with System\_Rx.
