

# New X-WOOL™ Prosthetic Sock.

Knit with the magic of silver.

Other favorites

- Soft-Sock
- Sterling
- A-Plus
- Super Sock

Drawing on *more than 80 years* of manufacturing innovation, Knit-Rite® is proud to introduce a new line of prosthetic socks—**X-WOOL™**. A blend of wool, LYCRA® and X-STATIC®—The Silver Fiber™, **X-WOOL** is the only high-performance fiber *system* that takes advantage of the many qualities of pure silver. Naturally anti-microbial, X-STATIC safely inhibits the growth of odor-causing bacteria. Silver also has unbeatable thermodynamic properties, so patients stay cooler in the summer and warmer in the winter.

**X-WOOL** is the latest addition to the Knit-Rite family of prosthetic socks:

- **Soft-Sock®** With CoolMax®/LYCRA for superior moisture wicking.
- **Sterling® Socks**. Developed in 1921—an industry standard available in a variety of fibers.
- **A-Plus®** An acrylic/LYCRA blend for softness and elasticity.
- **Super Sock®** The most popular 100% virgin wool sock in the U.S.
