## SALTO - ANKLE STABILIZER

Thanks to the use of an exclusive, hypo- allergenic and breathable fabric, resulting from a careful research and selection of materials, as well as the use of a unique construction technology, this innovative ankle stabilizer combines the ease of use of a mass-produced item with the effectiveness of a taping bandage. It is the only ankle brace with a posterior opening, allowing easy and painless application, that offers a constant control of the inversion and eversion degree. Far from being cumbersome, it can easily fit any shoe and can be worn on either foot.

### INDICATIONS

- Traumatic pathologies: distortions - tendonitis - luxations.
- Rehab phase: passive support for the ankle functional rehab, it controls inversion and eversion movements of the ankle.

### MERCURIO - ANKLE LOCK

- For light trauma of the ankle mortise.
- Can be completely adjusted, to meet the desired level of compression.
- Has a close/snug fit and will easily fit inside any shoe.
- Is Neoprene free and will not retain perspiration.
- Is hypo-allergenic and will not cause irritation when worn directly on the skin.
- One size fits all and can be worn on both the right and/or left foot.

### STRENUA - EXTRA ANKLE LOCK

- Traumatic pathologies: dislocations - distortions and sub-luxation of the ankle.
- Rehab phase: passive support for the ankle during late functional rehab phase.
- Strongly indicated for use during sport, prevents excessive pronation / supination of the ankle.
