

Motionfoot®

The Motionfoot® truly improves the comfort and naturalness of walking and using an artificial foot. These features include:

- A hydraulic ankle with up to 50 degrees of motion, allowing natural-like plantar flexion (pointing the toe downward) and dorsi flexion (pointing the toe upward)
- The wearer can adjust the resistance of the ankle. Two independent hydraulic settings allow you to match the ankle to your activities.
- The wearer can also manually lock the ankle at 90 degrees (neutral standing position). This allows you to prevent unwanted plantar flexion for specific activities.
- The carbon fiber Sole Plate can also be adjusted (by your prosthetist) to match your weight and activity level.
