

# DON'T FORGET THE CLASSICS!

Why aren't you using

# TefloGlass™

Everyone else is!

## THE ULTIMATE!!! OVEN LINING

TefloGlass™ is a Teflon® impregnated fiberglass, that's breathable and porous weave creates a non-stick surface- which will not trap air!

TefloGlass™ will:

- Insure the best uniform heating for any thermoplastic material.
- Eliminate the need for silicone powders or other parting agents.
- Improve vacuum forming efficiency.
- Lasts longer and endures up to one year of everyday use.
- Available in a width of 48" by the foot.
