

Whenever, wherever braces are needed, we've got you covered.

At Orthomerica, we can fabricate a custom orthosis to meet your specifications and unique patient challenges. When selecting a custom fabrication facility to be an extension of your clinical practice, you need to be assured that the company has the manufacturing, technical and clinical resources to deliver exceptional quality and superior service. Orthomerica dedicates its efforts to O&P practitioners by offering:

- In-house, Certified Orthotists for consultation on your most challenging custom orders.
- An extensive variety of anatomical designs from a core library of thousands of physical and virtual shapes.
- The most recent advances in CAD/CAM capabilities that allow Orthomerica to create more precise custom cranial, spinal and lower extremity molds for immediate fabrication.
