

A standing ovation!

There are so many reasons to cheer on Lacey—and you—that we barely know where to start! Lacey says she couldn't have done it without the incredible daily support of her family, her friends, her C-Leg—and her prosthetist, Chris Hoyt.

The C-Leg is the most fit, most studied prosthetic leg in the world—thanks to you. By working with the transformative technology introduced by the C-Leg, you've opened up new horizons for transfemoral amputees by helping to provide all-day stability and reduce falls.

We hope you'll help us celebrate the 15th anniversary of the C-Leg by joining us in giving a hand—to yourself!

Visit us at ottobockus.com/StandingOvation to find great marketing and reimbursement tools—and to spread the news that there's nothing like the C-Leg!
