

Some Things Just Go Together

1958 2008 YEARS 

Like Pie and Ice Cream. Or Swing and Stance.

Some things complement each other perfectly, and the C-Leg[®] demonstrates just that. It delivers the ultimate menu as the first knee with active microprocessor control over both swing and stance phase.

Combining both ingredients lets the C-Leg[®] anticipate the user's next move: active stance control to switch into and out of stance and swing control to smoothly speed up or slow down the knee throughout every step. This means the C-Leg is always a step ahead for the highest standard in security and reliability.

Don't settle for less. Get the full flavor and function of the C-leg[®] and call your local Sales Representative at 800.328.4058 (U.S.) or 800.665.3327 (Canada).
