

Who says you can't have it all?

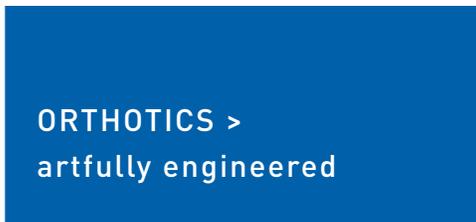

Otto Bock offers you two lines of competitively priced orthotic components to help you create just the right solutions for your patients. With exceptional durability and quality, you can't go wrong — and just one phone call offers the satisfaction of personal choice.

Our Otto Bock line offers high quality, modular components designed to give you added flexibility for ongoing repair and servicing. The result - less time at the bench for you, and more time working with your patients.

Due to precise manufacturing techniques, our Masser™ line offers your patients the smoothest movement with positive lock available in a pre-assembled system. And, pre-assembly means you save time during initial fabrication.

So, increase your own satisfaction. To see a sample or order a component from either line, call 800-328-4058 to talk to your Sales Representative. Or, in Canada, call 800-665-3327.

Whichever line you chose, you'll be satisfied.

*"I am easily satisfied with
the very best."*

— Sir Winston Churchill
