Alpha[®] Select Liner

Controlled pistoning with unlimited flexion

Alpha Select Liners combine many frequently-requested liner traits into one product. The liners are well-suited for amputees used to the durability of silicone but continually seeking greater comfort.

- Controlled pistoning without a potentially irritating distal matrix
- New hybrid gel combines durability and comfort
- Broad range of knee flexion without sacrificing comfort...even during long periods of sitting or bending
- Easily dons and comfortably conforms to various limb shapes without undue pressure
- Extra distal cushioning yet thin behind the knee and proximally
- Flexible umbrella feels virtually unnoticeable
- Retrofittable option available
