

PROSTHETICS IS CHANGING. CAN YOU ADJUST?

Turn any socket into
an *adjustable socket*

with
revolimb™

Revolimb's Lamination Kit allows you to embed adjustability directly into the matrix of any socket. From there, fit and comfort is controlled by the patient with a simple click of the BOA dial whenever an adjustment is needed. The result is a sleek, discreet, and durable socket that changes whenever the patient needs it.

PUT YOUR PATIENTS IN CONTROL OF THEIR COMFORT.
