

## EZ Stride Carbon Fiber KAFO

### Dynamic, light-weight alternative

- Stronger and lighter than a traditional, plastic KAFO
- 90% less skin contact at the ankle-foot area
- Open heel design eliminates potential sores and pressure points
- Dynamic carbon fiber provides dorsi-assist and helps propel the patient through their gait cycle
- Less patient energy expended
- Choice of knee joints
- AFO section can be made to any style (anterior or posterior strut and band)
- Can be easily converted to an EZ Stride AFO
- Easily customized at our facility or yours
- Best choice for Genu-recurvatum patients

Since I began using Spinal Solutions, I have ordered many late evening and weekend custom TLSO's and TLSO's with thigh extensions needed for my patients. Spinal Solutions has always delivered my custom braces on time. Whether it's ground or overnight shipping, Saturday delivery, or Delta Dash, they never let me down. In my twenty-year career that can't be said for every fabrication facility I've used. I urge you to give Spinal Solutions a try. I feel confident you will be very satisfied with the accurate, quick, and reliable service they provide.
