

INTRODUCING THE

GLIDE

WEAR[®] by Tamarack

PROSTHETIC LINER PATCH

Before GlideWear...

*After 11 Weeks
of GlideWear Use*

A new low friction fabric technology by Tamarack that dramatically reduces friction and related shear forces between the skin and prosthesis.

GlideWear Prosthetic Liner Patches are indicated for amputees who encounter irritation and skin breakdown from their liner or socket.

Simply position the GlideWear Patch between the prosthetic liner or socket and skin each day for continuous protection.

✓ Conformable ✓ Long-Lasting ✓ Adhesive-Free

"Simple solutions like the use of a small GlideWear patch can allow amputees to gain the full benefit of their advanced prosthetic componentry by allowing them to spend additional time in their prostheses without the incidence of skin breakdown."

Charles W. Kuffel, CPO, FAAOP
President & Clinical Director,
Arise Orthotics & Prosthetics
