- Visit www.towerortho.com for pricing, coding information, casting procedures, order forms and more!

The **Tri-Planer AFO** is the latest design from Tower Orthopedic Designs, a central fabricator of custom lower limb orthoses for over 15 years! The **TP-AFO** is designed to address the foot and ankle pain and stability problems suffered by those with PTTD or DJD. The unique TPE-AFO design comfortably

addresses the weight fluctuations experienced by those suffering from edema. All TP-AFO designs utilize less plastic than other leather AFO styles, so the fit is more low-profile and is easier for the patient to insert into a shoe.
