

THOMAS FELLER

(BK) OCTOBER, 1973

Tom is currently President of the International Amputee Soccer Association. He is also an Account Representative at Seattle Systems. Photographed November of 2001, while testing the original Cadence HP™ design.

SEATTLE SYSTEMS

cadence HP™

Too much spring or flex in your current foot?

Try the Real Feel of the new Cadence HP™. Seattle Systems designed the first high performance foot for every individual and activity level. The patented "C-shape" design makes Cadence HP™ the only foot on the market without a flat spot. Just like a biological foot, this one provides forward momentum for a natural gait.

Patented 'C' design stores energy, contributing to the unique Real Feel sensation of the Cadence HP™.

Seattle System's split keel is designed to fit and perform with the handsome Seattle LightFoot® cosmesis. (The footshell is included with each foot order.)

High grade titanium adapter and linkage provides smooth, controlled plantarflexion eliminating foot slap and flat spots.

Interchangeable heel height wedges.
