ANKLE-FOOT ORTHOSES

Create ankle-foot orthoses with OMEGA Tracer and the OMEGA Scanner. By using the OMEGA Scanner, clinicians have multiple options for AFO shape capture. Each option offers patient convenience and provides accurate and reliable 3D images. OMEGA Tracer software makes modifying AFO shapes and preparing them for fabrication intuitive and easy. In addition, clinicians have the opportunity to create personalized AFO modification wizards. OMEGA Tracer AFO files may be used with in-house carvers or sent to external central fabrication facilities.

OMEGA Tracer - the leader in CAD/CAM for the O&P industry
