PATIENTS SEE
the freedom to climb to the top

YOU SEE
a prosthetic foot that allows
inward and outward movement
while maintaining stability

Fusion® Foot

With outstanding inversion and eversion, it’s an entirely new way to offer function without compromise. And it’s the result of our constant pursuit of improved prosthetic products—featuring adjustable snubbers that allow the foot to adapt to uneven terrain.

So you see a satisfied patient.
And they see a satisfying, active future.
