For 2005, Ohio Willow Wood is revamping its Summit course offerings! Course content and formats are still being finalized. Rest assured that there will be standard product certification courses mixed in with entirely new course offerings.

Since 1999, Ohio Willow Wood has been providing prosthetists education about its products and new industry trends and methods. Products such as Alpha® Liners, Pathfinder™ Foot and OMEGA™ Tracer CAD system have been featured at Ohio Willow Wood seminars both on the road and at the on-site Summit training facility.

Visit our website, www.owwco.com, or check this publication next month for a listing of topics, dates and times of Ohio Willow Wood’s next session of Summit courses.
